1. Do not attempt to operate this oven with the door open since open door operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.

2. Do not place any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.

3. Do not operate the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the
   a. Door (bent),
   b. Hinges and latches (broken or loosened),
   c. Door seals and sealing surfaces.

4. The oven should not be adjusted or repaired by anyone except properly qualified service personnel.

### BEFORE YOU CALL FOR SERVICE

If the oven fails to operate:

1. Check to ensure that the oven is plugged in securely. If it is not, remove the plug from the outlet, wait 10 seconds, and plug it in again securely.
2. Check for a blown circuit fuse or a tripped main circuit breaker. If these seem to be operating properly, test the outlet with another appliance.
3. Check to ensure that the control panel is programmed correctly and the timer is set.
4. Check to ensure that the door is securely closed engaging the door safety lock system. Otherwise, the microwave energy will not flow into the oven.

IF NONE OF THE ABOVE RECTIFIES THE SITUATION, THEN CONTACT A QUALIFIED TECHNICIAN. DO NOT TRY TO ADJUST OR REPAIR THE OVEN YOURSELF.

### INSTALLATION

1. Make sure that all the packing materials are removed from the inside of the door.
2. **WARNING:** Check the oven for any damage, such as misaligned or bent door, damaged door seals and sealing surface, broken or loose door hinges and latches and dents inside the cavity or on the door. If there is any damage, do not operate the oven and contact qualified service personnel.
3. This microwave oven must be placed on a flat, stable surface to hold its weight and the heaviest food likely to be cooked in the oven.
4. Do not place the oven where heat, moisture, or high humidity are generated, or near combustible materials.
5. For correct operation, the oven must have sufficient airflow. Allow 20cm of space above the oven, 10cm at back and 5cm at both sides. Do not cover or block any openings on the appliance. Do not remove feet.
6. Do not operate the oven without glass tray, roller support, and shaft in their proper positions.
7. Make sure that the power supply cord is undamaged and does not run under the...
oven or over any hot or sharp surface.

8. The socket must be readily accessible so that it can be easily unplugged in an emergency.

9. Do not use the oven outdoors.

**GROUNDING INSTRUCTIONS**

This appliance must be grounded. This oven is equipped with a cord having a grounding wire with a grounding plug. It must be plugged into a wall receptacle that is properly installed and grounded. In the event of an electrical short circuit, grounding reduces risk of electric shock by providing an escape wire for the electric current. It is recommended that a separate circuit serving only the oven be provided. Using a high voltage is dangerous and may result in a fire or other accident causing oven damage.

**WARNING** Improper use of the grounding plug can result in a risk of electric shock.

Note

1. If you have any questions about the grounding or electrical instructions, consult a qualified electrician or service person.

2. Neither the manufacturer nor the dealer can accept any liability for damage to the oven or personal injury resulting from failure to observe the electrical connection procedures.

The wires in this cable main are colored in accordance with the following code:

Green and Yellow = EARTH

Blue = NEUTRAL

Brown = LIVE

**RADIO INTERFERENCE**

Operation of the microwave oven can cause interference to your radio, TV, or similar equipment.

When there is interference, it may be reduced or eliminated by taking the following measures:

1. Clean door and sealing surface of the oven.

2. Reorient the receiving antenna of radio or television.

3. Relocate the microwave oven with respect to the receiver.

4. Move the microwave oven away from the receiver.

5. Plug the microwave oven into a different outlet so that microwave oven and receiver are on different branch circuits.

**IMPORTANT SAFETY INSTRUCTIONS**

When using electrical appliance basic safety precautions should be followed, including the following:

**WARNING**: To reduce the risk of burns, electric shock, fire, injury to persons or exposure to excessive microwave energy:

1. Read all instructions before using the appliance.

2. Use this appliance only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in this appliance. This type of oven is specifically designed to heat, cook or dry food. It is not designed for industrial or laboratory use.

3. Do not operate the oven when empty.

4. Do not operate this appliance if it has a
damaged cord or plug, if it is not working properly or if it has been damaged or dropped. If the supply cord is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person in order to avoid a hazard.

5. **WARNING:** Only allow children to use the oven without supervision when adequate instructions have been given so that the child is able to use the oven in a safe way and understands the hazards of improper use.

6. Warning: When the appliance is operated in the combination mode, children should only use the oven under adult supervision due to the temperatures generated.

7. To reduce the risk of fire in the oven cavity:
   a. When heating food in plastic or paper container, keep an eye on the oven due to the possibility of ignition;
   b. Remove wire twist-ties from paper or plastic bags before placing bag in oven.
   c. If smoke is observed, switch off or unplug the appliance and keep the door closed in order to stifle any flames.
   d. Do not use the cavity for storage purposes. Do not leave paper products, cooking utensils or food in the cavity when not in use.

8. **WARNING:** Liquid or other food must not be heated in sealed containers since they are liable to explode.

9. Microwave heating of beverage can result in delayed eruptive boiling, therefore care has to be taken when handling the container.

10. Do not fry food in the oven. Hot oil can damage oven parts and utensils and even result in skin burns.

11. Eggs in their shell and whole hard-boiled eggs should not be heated in microwave ovens since they may explode even after microwave heating has ended.

12. Pierce foods with heavy skins such as potatoes, whole squashes, apples and chestnuts before cooking.

13. The contents of feeding bottles and baby jars should be stirred or shaken and the temperature should be checked before serving in order to avoid burns.

14. Cooking utensils may become hot because of heat transferred from the heated food. Potholders may be needed to handle the utensil.

15. Utensils should be checked to ensure that they are suitable for use in microwave oven.

16. **WARNING:** It is hazardous for anyone other than a trained person to carry out any service or repair operation which involves the removal of any cover which gives protection against exposure to microwave energy.

17. This product is a Group 2 Class B ISM equipment. The definition of Group 2 which contains all ISM (Industrial, Scientific and Medical) equipment in which radio-frequency energy is intentionally generated and/or used in the form of electromagnetic radiation for the treatment of material, and spark erosion equipment. For Class B equipment is equipment suitable for use in domestic establishments and in establishments directly connected to a low voltage power supply network which supplies buildings used for domestic purpose.

18. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

19. Children should be supervised to ensure that they do not play with the appliance.

20. The microwave oven is only used in freestanding.

21. **WARNING:** Do not install oven over a range cooktop or other heat-producing appliance. if installed could be damaged and the warranty would be avoid.

22. The accessible surface may be hot during operation.

23. The microwave oven shall not be placed in a cabinet.

24. The door or the outer surface may get hot when the appliance is operating.

25. The temperature of accessible surfaces may be high when the appliance is operating.

26. The appliance shall be placed against a wall.
27. Appliance is not to be used by children or persons with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction.

28. Children being supervised not to play with appliance.

29. WARNING: If the door or door seals are damaged, the oven must not be operated until it has been repaired by a competent person.

30. The instructions shall state that appliances are not intended to be operated by means of an external timer or separate remote-control system.

31. The microwave oven is for household use only and not for commercial use.

32. Never remove the distance holder in the back or on the sides, as it ensures a minimum distance from the wall for air circulation.

33. Please secure the turn table before you move the appliance to avoid damages.

34. Caution: It is dangerous to repair or maintain the appliance by no other than a specialist because under these circumstances the cover have to be removed which assures protection against microwave radiation. This applies to changing the power cord or the lighting as well. Send the appliance in these cases to our service centre.

35. The microwave oven is intended for defrosting, cooking and steaming of food only.

36. Use gloves if you remove any heated food.

37. Caution! Steam will escape, when opening lids or wrapping foil.

38. This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children unless they are aged from 8 years and above and supervised.

39. If smoke is emitted, switch off or unplug the appliance and keep the door closed in order to stifle.

---

**MICROWAVE COOKING PRINCIPLES**

1. Arrange food carefully. Place thickest areas towards outside of dish.

2. Watch cooking time. Cook for the shortest amount of time indicated and add more as needed. Food severely overcooked can smoke or ignite.

3. Cover foods while cooking. Covers prevent spattering and help foods to cook evenly.

4. Turn foods over once during microwaving to speed cooking of such foods as chicken and hamburgers. Large items like roasts must be turned over at least once.

5. Rearrange foods such as meatballs halfway through cooking both from top to bottom and from the center of the dish to the outside.
1. The ideal material for a microwave utensil is transparent to microwave, it allows energy to pass through the container and heat the food.

2. Microwave cannot penetrate metal, so metal utensils or dishes with metallic trim should not be used.

3. Do not use recycled paper products when microwave cooking, as they may contain small metal fragments which may cause sparks and/or fires.

4. Round/oval dishes rather than square/oblong ones are recommend, as food in corners tends to overcook.

5. Narrow strips of aluminum foil may be used to prevent overcooking of exposed areas. But be careful don't use too much and keep a distance of 1 inch (2.54cm) between foil and cavity.

The list below is a general guide to help you select the correct utensils.

**PART NAMES**

1. Door Safety Lock System
2. Oven Window
3. Roller Ring
4. Shaft
5. Control Panel
6. Wave Guide
   (Please do not remove the mica plate covering the wave guide)
7. Glass Tray
8. Grill Heater
9. Baking plate
CONTROL PANEL

DISPLAY WINDOW
Use to indicate clock, cooking time, etc.

NUMBER PADS
Use to enter clock, cooking time, temperature, etc.

QUICK COOK BUTTONS:
CAKE, POTATO, PIZZA, POPCORN, BEVERAGE, SPaghetti, REHEAT, CHICKEN

POWER LEVEL
Press to select microwave power level.

WEIGHT DEFROST
Touch to defrost food.

GRILL
Press to set a grill-cooking program.

CONVECTION
Press to program convection cooking.

MICROWAVE + CONVECTION
Press to select one of four combination cooking settings.

MICROWAVE+ GRILL
Press to select one of two combination cooking settings.

TIMER/CLOCK
Use to set the clock and the oven timer.

QUICK START
Touch to start the oven quickly at full power

CANCEL
Touch to stop cooking program or clear all previous settings before cooking starts.

START
Press to start cooking program.
HOW TO SET THE OVEN CONTROLS

During cooking program, press CANCEL to pause the program, then press START to resume. Press CANCEL twice to cancel the program. End will display with beeps to remind the program is over, and it will sound every two minutes until you press any pad or open the door.

SETTING THE CLOCK
It is a 12-hour or 24-hour clock. When plug in, the default clock is 24-hour clock.
  1. In standby status, press and hold down TIMER/CLOCK for 3 seconds to select 24-hour clock, then press TIMER/CLOCK pad to select 12-hour clock,
  2. Use the number pads to enter clock time.
  3. Press TIMER/CLOCK to confirm.

QUICK START
Use this feature to program the oven to microwave food at 100% power conveniently. Press QUICK START button in quick succession to set the cooking time. The oven will auto-start immediately. The longest cooking time is 10 minutes.

MICROWAVE COOKING
The longest cooking time is 99 minutes and 99 seconds. Microwave cooking allows you to customize cooking power and time. First, you select a power level by pressing the POWER LEVEL pad a number of times (see the table below). Then you set the cooking time using the numeric pads, before pressing the START pad.

</tbody>
</table>

Suppose you want to cook for 5 minute at 60% power level.
  1. In waiting mode, place food into oven, and close it.
  2. Press POWER LEVEL pad a number of times to set power.
  3. Press number pads to enter cooking time until the correct cooking time (5:00) is displayed.
  4. Press START pad.

NOTE: During cooking, you can check the present power by pressing POWER LEVEL.
GRILL
The longest cooking time is 99 minutes and 99 seconds. Grill cooking is particularly useful for thin slices of meat, steaks, chops, kebabs, sausages and pieces of chicken. It is also suitable for hot sandwiches and au gratin dishes.
Suppose you want to program grill cooking for 12 minutes.
1. In waiting mode, place food into oven, and close it.
2. Press GRILL button once.
3. Use the number pads to enter cooking time.
4. Press START button.

MICROWAVE +GRILL
The longest cooking time is 99 minutes and 99 seconds. This feature allows you to combine grill and microwave cooking on two different settings. First, press this button once or twice to choose a proper combination setting, then, at the screen prompt, enter the desired cooking time. After you have pushed the START button, the system begins to count down. During cooking, you can check the power level by pressing MICROWAVE+GRILL.

COMBINATION 1
Use for fish or au gratin. Suppose you want to set combination 1 cooking for 25 minutes.
1. Press MICROWAVE+GRILL button once.
2. Use the number pads to enter 25:00.
3. Press START button.

COMBINATION 2
Use for pudding, omelets, baked potatoes and poultry.
Suppose you want to set combination 2 cooking for 12 minutes.
1. Press MICROWAVE+GRILL button twice.
2. Use the number pads to enter 12:00.
3. Press START button.

CONVECTION
During convection cooking, hot air is circulated throughout the oven cavity to brown and make crisp foods quickly and evenly. This oven can be programmed for ten different cooking temperatures. Min cooking time user can set is 1 min, and max 99 min and 99 sec.

To Cook with Convection
To cook with convection, press CONVECTION pad once and then press the number pads to enter the desired convection temperature (110℃ ~200℃).
Suppose you want to cook at 180℃ for 40 minutes.
1. In waiting mode, place food into oven, and close it.
2. Press CONVECTION pad.
3. Press number pad 8.
4. Press number pads to enter the desired cooking time.
5. Press START pad.
To Preheat and Cook with Convection
Your oven can be programmed to combine preheating and convection cooking operations.
Suppose you want to preheat to 170°C and then cook 35 minutes.
1. In waiting mode, press CONVECTION pad.
2. Press number pad 7 to indicate convection temperature.
3. Press START button.
4. When oven reaches the designated temperature, it “beep” per 5 sec to remind user.
5. Open the door and place container of food at the center of the turntable.
6. Use the number pads to enter cooking time.
7. Press START button.
Note: The longest reheat time is 30 minutes, and the reheat time cannot be set.

MICROWAVE +CONVECTION
This oven has four pre-programmed settings that make it easy to cook with both convection heat and microwave automatically. Min cooking time user can set is 1 min, and max 99 min and 99 sec.
Press number button (1~4) select to program convection temperature (110°C ~200°C).
Suppose you want to bake food for 24 minutes on COMB3.
1. In waiting mode, place food into oven, and close it.
2. Press MICROWAVE+CONVECTION button.
3. Use the number pads to enter convection temperature.
4. Use the number pads to enter cooking time as desired
5. Press START button to start.
NOTE: During cooking, you can check the convection temperature while cooking is in progress by pressing the MICROWAVE+CONVECTION button.

WEIGHT DEFROST
The oven can be used to defrost meat, poultry, and seafood.
Suppose you want to defrost frozen meat.
1. In waiting mode, place food into oven, and close it.
2. Press WEIGHT DEFROST once or repeatedly to select weight (100g~1800g).
3. Press START.
Note: During defrosting program, the system will pause and sound beeps to remind user to turn food over, and then press START to resume the defrosting.

MULTI-STAGE COOKING
Your oven can be programmed for up to 3 automatic cooking sequences.
Suppose you want to set the following cooking program.

Microwave cooking
↓
Convection cooking

1. In waiting mode, place food into oven, and close it.
2. Press POWER LEVEL button to set power level.
3. Use the number pads to enter cooking time.
4. Press CONVECTION pad once.
5. Use the number pads to enter convection temperature.
6. Use the number pads to enter convection cooking time.
7. Press START button.
NOTE: Weight defrost and menu cook cannot be set in the multistage cooking program.
MENU COOK
For food or the following cooking mode, it is not necessary to program the duration and the cooking power. It is sufficient to indicate the type of food that you wish to cook as well as the weight of this food.
1. In waiting mode, place food into oven, and close it.
2. Press the individual icon pad once or repeatedly to select the weight of food to be cooked.
3. Press START.

Auto Cook Code/Menu

OTHER CONVENIENT FEATURES

Minute Timer
To use the timer feature, as when you need to be reminded of the cooking or some other things,
1. Press TIMER/CLOCK pad.
2. Use the number pads to enter the time to be counted down.
3. Press START pad.

NOTE: When the countdown ends, the unit will beep.
Timer countdown can be seen in the display for 5 seconds before the clock or cooking time display returns. The timer will continue to count down even though it is not displayed.
To check the status of the count down, press the TIMER/CLOCK pad once.

CHILD PROOF LOCK
The child proof lock prevents unsupervised operation by little children.
To set the child proof lock: In standby mode, press and hold CANCEL button for 3 seconds, then a beep will sound and the indicator light will turn on. In the lock state, all buttons are disabled.
To cancel the child proof lock: Press CANCEL button for 3 seconds, then a beep will sound and the indicator light will turn off.

OVERHEATING PROTECTION
When the system enters into super high temperature protection status, the digital display shows “E01” and continues to beep till the system comes back to normal condition and then press “CANCEL”.

LOW TEMPERATURE PROTECTION
When the system enters into super low temperature protection status, the digital display shows “E02” and continues to beep till the system comes back to normal condition and then press “CANCEL”.

SENSOR MALFUNCTION PROTECTION
The system enters into protection mode when the system sensor is Short Circuited. The display shows “E03” and continues to beep until pressing “CANCEL” button. Call consumer service to check and replace the faulty sensor.
COOLING FEATURE
The electronically controlling system of the microwave oven has the feature of cooling. As for any cooking mode which cooking time above 2 minutes, after finishing cooking, the oven fan will work about 3 minutes automatically to cool the oven for prolonging the life of the oven.

CLEANING AND CARE

1. Turn off the oven and remove the power plug from the wall socket before cleaning.
2. Keep the inside of the oven clean. When food splatters or spilled liquids adhere to oven walls, wipe with a damp cloth. Mild detergent may be used if the oven gets very dirty. Avoid the use of spray and other harsh cleaners as they may stain, streak or dull the door surface.
3. The outside surfaces should be cleaned with a damp cloth. To prevent damage to the operating parts inside the oven, water should not be allowed to seep into the ventilation openings.
4. Wipe the door and window on both sides, the door seals and adjacent parts frequently with a damp cloth to remove any spills or spatters. Do not use abrasive cleaner.
5. Do not allow the control panel to become wet. Clean with a soft, damp cloth. When cleaning the control panel, leave oven door open to prevent oven from accidentally turning on.
6. If steam accumulates inside or around the outside of the oven door, wipe with a soft cloth. This may occur when the microwave oven is operated under high humidity condition. And it is normal.
7. It is occasionally necessary to remove the glass tray for cleaning. Wash the tray in warm sudsy water or in a dishwasher.
8. The roller ring and oven floor should be cleaned regularly to avoid excessive noise. Simply wipe the bottom surface of the oven with mild detergent. The roller ring may be washed in mild sudsy water or dishwasher. When removing the roller ring from cavity floor for cleaning, be sure to replace in the proper position.
9. Remove odors from your oven by combining a cup of water with the juice and skin of one lemon in a deep microwaveable bowl, microwave for 5 minutes. Wipe thoroughly and dry with a soft cloth.
10. When it becomes necessary to replace the oven light, please consult a dealer to have it replaced.
11. The oven should be cleaned regularly and any food deposits removed. Failure to maintain the oven in a clean condition could lead to deterioration of the surface that could adversely affect
the life of the appliance and possibly result in a hazardous situation.

12. Please do not dispose this appliance into the domestic rubbish bin, it should be disposed to the particular disposal center provided by the municipalities.

13. When the microwave oven with grill function is first used, it may produce slight smoke and smell. This is a normal phenomenon, because the oven is made of a steel plate coated with lubricating oil, and the new oven will produce fumes and odor generated by burning the lubricating oil. This phenomenon will disappear after a period of using.
